## GUIDE TO THE SOUNDIX SYSTEM USED IN ARRANGING INDEXES TO PASSENGER LISTS

The index cards reproduced in this microcopy are arranged according to the Soundex filing system. This system, alphabetic for the first letter of surname and numeric thereunder as indicated by divider cards, keeps together names of the same and similar sounds but of variant spellings.

To search for the name of a passenger arriving at Baltimore, you must first work out the code number for the surname of the passenger. No number is assigned to the first letter of the surname. If the passenger's name is Kuhne, for example, the index card will be in the "K" segment of the index. The code number for Kuhne, worked out according to the system below, is 500.

### SOUNDEX CODING GUIDE

Code	Key Letters and Equivalents
1	b, p, f, v
2	c, s, k, g, j, q, x, z
3	d, t
4	l
5	m, n
6	r

The letters a, e, i, o, u, y, w, and h are not coded.

The first letter of a surname is not coded.

Every Soundex number must be a 3-digit number. A name yielding no code numbers, as Lee, would thus be L 000; one yielding only one code number would have two zeros added, as Kuhne, coded as K 500; and one yielding two code numbers would have one zero added, as Ebell, coded as E 140. Not more than three digits are used, so Ebelson would be coded as E 142, not E 1425.

When two key letters or equivalents appear together, or one key letter immediately follows or precedes an equivalent, the two are coded as one letter, by a single number, as follows: Kelly, coded as 400; Buerck, coded as 620; Lloyd, coded as 300; and Schaefer, coded as 160.

After determining the code number, such as K 500 for Kuhne, consult the contents listing for this microcopy, which gives the roll

breakdown, to locate the roll on which that code number appears. When looking at a particular roll you will see that if several names are coded as K 500--Kam, Abraham; Kann, A.; Kenny, Ann; Kohmi, August; and Kuhne, Adam--the cards will appear in the following order, alphabetical by given name: Kann, A.; Kam, Abraham; Kuhne, Adam; Kenny, Ann; and Kohmi, August. Divider cards are used to show most code numbers, but not all. For instance, one divider may be numbered 350 and the next one 400. Between the two divider cards there may be names coded 352, 350, 360, 364, 365, and 355, but instead of being in numerical order they are interfiled and arranged alphabetically by given name.

Such prefixes to surnames as "van," "Von," "Di," "de," "le," "Di," "D'," "dela," or "du" are sometimes disregarded in alphabetizing and in coding.

The following names are examples of coding, and are given only to aid the user of this microcopy.

<u>Name</u>	<u>Letters Coded</u>	<u>Code No.</u>
Allricht	l, r, c	A 462
Eberhard	b, r, r	E 166

1. The first part of the paper is devoted to a general  
discussion of the principles of the theory of the  
relativity of motion. It is shown that the laws of  
physics are the same in all systems of reference  
moving with uniform velocity relative to each other.  
The theory of the relativity of motion is based on  
the two principles of relativity: the principle of  
the relativity of motion and the principle of the  
constancy of the velocity of light in vacuum.  
The theory of the relativity of motion is a  
generalization of the theory of mechanics.  
The theory of the relativity of motion is a  
generalization of the theory of mechanics.  
The theory of the relativity of motion is a  
generalization of the theory of mechanics.

2. The second part of the paper is devoted to a  
discussion of the principles of the theory of the  
relativity of motion. It is shown that the laws of  
physics are the same in all systems of reference  
moving with uniform velocity relative to each other.  
The theory of the relativity of motion is based on  
the two principles of relativity: the principle of  
the relativity of motion and the principle of the  
constancy of the velocity of light in vacuum.  
The theory of the relativity of motion is a  
generalization of the theory of mechanics.  
The theory of the relativity of motion is a  
generalization of the theory of mechanics.

A black and white photograph showing a wide, calm body of water, possibly a lake or a wide river. The water reflects the sky. In the distance, a low, dark shoreline is visible under a bright, overcast sky. The overall mood is serene and expansive.
